

Exploring the Seasons

nature: plants and animals

Write about the natural world where you live. First answer the questions, then use them to help you plan your message.

Where you live, what flowers are out now? What colour are they?

What are the parks, countryside or woods like at the moment? What colour are the leaves?

What insects and mini beasts can you find at this time of year?

What living creatures do you find at the seaside or in rivers and lakes? Do people come to relax there?
